- Web Developer Certification**
Ecole O'Clock | 2019-2020
- Opquast — Web Quality Best Practices Training** | 2019
- Mathematics & CS**
Paris Descartes | 2008-2011

SUMMARY

Lead Frontend Engineer with 6+ years of experience building regulated digital products in insurance and savings. Owned frontend architecture for a multi-insurer subscription platform (10 applications, 8 shared packages, Turborepo monorepo). Led a team of 4 engineers. Deep expertise in design systems, GDPR compliance, and delivering high-quality user experiences on business-critical flows.

LEADERSHIP & IMPACT

- Led and mentored a team of 4 frontend engineers through structured code reviews, pairing, and technical standards
- Designed frontend architecture across 10 applications and 8 shared packages within a Turborepo monorepo
- Delivered GDPR-compliant subscription flows for 3 insurance providers (Kelia, Quanta, Garance)
- Built compliant UX flows for regulated financial processes with Zod validation
- Owned production reliability, release management, and incident response for frontend systems

EXPERIENCE

Germen

2021 - Present

Lead Frontend Engineer

- Owned frontend architecture for a multi-insurer subscription platform: 10 Next.js apps, 8 shared packages, Turborepo/pnpm monorepo
- Designed and shipped a design system (25+ Radix UI / Tailwind components) adopted across all products, documented via Storybook
- Led a team of 4 frontend engineers: structured code reviews, pair programming, technical standards, and career growth
- Drove full migration from CRA + Redux to Turborepo monorepo, then modernized to Next.js App Router, Server Actions, and tRPC
- Delivered GDPR-compliant subscription flows for 3 insurance providers (Kelia, Quanta, Garance) with Zod validation and next-intl i18n
- Built advisor back-offices (Quanta, Dealbreaker) with RBAC, guardian management, and multi-insurer integrations
- Shipped a React Native mobile app (Garance) and built automation tools for collective fund transfers (Generali)

Skills: TypeScript, React, Next.js (App Router), tRPC, TanStack Query, Tailwind, Radix UI, shadcn/ui, Clerk, Zod, Drizzle ORM, React Native, PostgreSQL, AWS Lambda, Turborepo, Vercel, Playwright, Storybook

Studio Ambient

2022 - 2023

Full Stack Developer

- Shipped end-to-end React/Node platform with back-office CMS enabling non-technical staff to manage content
- Designed MongoDB schema and REST APIs, delivering features from database to production UI

Skills: TypeScript, React, Node.js, MongoDB, Express, Docker

Collect For Good

2022

Full Stack Developer (Volunteer)

- Platform built in response to the Ukraine crisis to coordinate humanitarian donation collection and transport
- Developed React frontend with Node.js/MongoDB backend under tight deadlines

Skills: React, TypeScript, Node.js, MongoDB, Tailwind

Tanke

2020 - 2021

Full Stack Developer

- Developed React applications and Node APIs powering influencer marketing campaigns for major brands
- Owned full stack delivery in fast-paced agency environment, from database design to production deployment

Skills: React, TypeScript, Node.js, PostgreSQL, MongoDB, Docker
